

Why we choose Django

As the programming language of Django is Python, we think it is easier for us to learn and adopt Django. With its free and open source, it makes the web development process very easy and the developer can fully focus on the designing process and boost performance. Thus, Django becomes an ideal tool for startups, where web design is the need, to bring out the real concept and prospects. There are many advantages.

- Easy to learn
- Clarity and readability
- Versatile
- Fast to write
- No glaring holes in its design
